Review Report of the Independent Auditor

Shareholders and Directors
Salmones Camanchaca S.A.

Result of the Interim Consolidated Financial Information Review

We have reviewed the accompanying interim consolidated financial statements of Salmones Camanchaca S.A. and subsidiaries, which comprise the interim consolidated statement of financial position as of June 30, 2023, and the related interim consolidated statements of comprehensive income for the six and three-month periods ended June 30, 2023 and 2022, the interim consolidated statements of changes in equity and cash flows for the six-month periods then ended, and the related notes to the interim consolidated financial statements (collectively referred to as interim consolidated financial information).

Based on our review, we are not aware of any significant modifications that should be made to the accompanying interim consolidated financial information to bring it into conformity with IAS 34, "Interim Financial Reporting" as incorporated into the International Financial Reporting Standards.

Basis for the results of the interim review

We conducted our review in accordance with Generally Accepted Auditing Standards in Chile applicable to reviews of interim financial information. A review of interim financial information consists primarily of applying analytical procedures and making inquiries of persons responsible for accounting and financial matters. A review of interim financial information is substantially less in scope than an audit performed in accordance with Generally Accepted Auditing Standards in Chile, the objective of which is to express an opinion on the interim financial information as a whole. Therefore, we do not express such an opinion. In accordance with the ethical requirements relevant to our review, we are required to be independent of Salmones Camanchaca S.A. and to comply with our other ethical responsibilities in accordance with such requirements. We believe that the results of the review procedures provide us with a reasonable basis for our conclusion.

Management's Responsibility for the Interim Consolidated Financial Information

Management of Salmenes Camanchaca S.A. is responsible for the preparation and fair presentation of the interim consolidated financial information in accordance with IAS 34, "Interim Financial Reporting" incorporated in the International Financial Reporting Standards. This responsibility includes designing, implementing and maintaining a relevant internal control to the preparation and fair presentation of the consolidated interim financial information that is free from material misstatement, whether due to fraud or error.

Other matters - Consolidated statement of financial position as of December 31, 2022

On February 22, 2023, we issued an unmodified opinion on the consolidated financial statements as of December 31, 2022 and 2021 of Salmenes Camanchaca S.A. and subsidiaries, which include the consolidated statement of financial position as of December 31, 2022 presented in the accompanying interim consolidated financial statements and the related notes.

SALMONES CAMANCHACA S.A. AND SUBSIDIARIES
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS

As of June 30, 2023

NOTE 1 - GENERAL INFORMATION

Salmones Camanchaca S.A. (hereinafter also the "Company") was formed when Camanchaca S.A. split on January 1, 2009. It was constituted as a private limited company in a public deed dated June 26, 2009. The purpose of the Company is breeding, producing, marketing and farming salmon and other species or organisms whose normal and most frequent environment is water, including research and development of salmonidae genetics, farming, cultivating, processing, producing and marketing sea-food.

The Company's registered office and principal offices are at Diego Portales 2000, Floor 13, Puerto Montt and its Chilean identification number (Rut) is 76,065,596-1.

On February 2, 2018, 19,800,000 shares representing 30% of the Company were placed at a price of Ch\$ 3,268 per share, and these are now traded on the Santiago, Chile and the Oslo, Norway Stock Exchanges. Consequently, Salmones Camanchaca is now a publicly listed company registered on the Securities Registry of the Financial Market Commission (CMF), under registration number 1150.

The Company increased its capital during the fourth quarter of 2021, where the preferential subscription period concluded with more than 96% of the shares subscribed at a price of Ch\$ 2,350. The process placed 8,193,660 of the 8,500,000 shares offered.

Control of the Company is exercised by Camanchaca S.A., which holds a 70.29% interest, the remaining 30% being held by third parties.

The Company farms salmon and is fully integrated within its value chain, which includes the genetic development of breeders and all the facilities required to produce fry, smolts and marine grow-out sites; primary and value-added processing plants; and sales and marketing using its own sales channels abroad or those belonging to its parent company, Camanchaca S.A., in the USA, Japan, Mexico, Spain, and an agent in China.

The main formats for selling frozen and fresh salmon are Trim C, D, and E, HG and HON fillets, in 4, 5, 6, and 8 oz. portions. The Company prepares its products in plants located in the Chilean Bio Bio and Los Lagos regions. They are mainly sold into the North American, Mexican, Japanese and Brazilian markets.

Since 2016 Salmones Camanchaca S.A. has participated in a joint venture partnership to produce and market trout. It has contributed aquaculture concessions to this partnership. The "Manager" of this joint venture is Caleta Bay S.A. and the other participant is Kabsa S.A. The results of the joint venture are divided equally among these three companies and are reflected in Other gains (losses) in the statement of net income by function.

Salmones Camanchaca produces Coho salmon, in order to take advantage of the estuary farming sites in the Tenth Region and complement the trout joint venture.

The consolidated financial statements of Salmones Camanchaca S.A. for the period ended June 30, 2023 were approved by the Board of Directors at a meeting held on August 16, 2023.

NOTE 2.- SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies used to prepare the consolidated financial statements of Salmenes Camanchaca S.A. have been applied in a uniform manner and are described as follows.

2.1 Period covered

These consolidated financial statements cover the following periods:

- Interim consolidated statements of financial position as of June 30, 2023 and December 31, 2022.
- Interim consolidated statements of net income by function for the six and three month periods ended June 30, 2023 and 2022.
- Interim consolidated statements of comprehensive income for the six and three months ended June 30, 2023 and 2022.
- Interim consolidated statements of cash flow, direct method for the six month periods ended June 30, 2023 and 2022.
- Interim consolidated statements of changes in equity for the six month periods ended June 30, 2023 and 2022.
- Notes to the interim consolidated financial statements

2.2 Basis of preparation

The interim consolidated financial statements of Salmenes Camanchaca S.A. as of June 30, 2023, the interim consolidated statements of comprehensive income for the periods ended June 30, 2023 and 2022 and the interim consolidated statements of changes in equity and cash flows for the periods then ended have been prepared in accordance with International Financial Reporting Standards (IFRS).

The interim consolidated financial statements present comparative information for the prior period. The Group presents an additional statement of financial position referring to the beginning of the previous year, when there is a retroactive application of an accounting policy, a retroactive restatement or a reclassification of items within the financial statements.

Presenting the consolidated financial statements requires the use of specific accounting estimates and also requires management to exercise its judgment when implementing the Company's accounting policies. Note 5 of these financial statements discloses the areas which involve a higher degree of judgment and complexity, where the assumptions and estimates have a significant effect on the financial statements.

These consolidated financial statements for Salmenes Camanchaca S.A. have been prepared from accounting records held by the Company. The figures in these consolidated financial statements are expressed in thousands of US dollars, which is the Company's functional currency.

There are no significant uncertainties regarding events or conditions as of the reporting date that may cast doubt on the Company's ability to continue functioning normally as a going concern.

These consolidated financial statements have been prepared on a historical cost basis, except for items recognized at fair value in accordance with International Financial Reporting Standards. The book values of assets and liabilities hedged with transactions that qualify for hedge accounting are adjusted to reflect changes in the fair value in relation to the hedged risks.

2.3 New pronouncements

a) New standards, interpretations and amendments

The Company has applied certain standards, interpretations and amendments for the first time, which are effective for periods beginning on or after January 1, 2023.

The standards, interpretations and amendments to IFRS that became effective at the date of the financial statements, their nature and impacts are as follows:

	Amendments	Mandatory application date
IFRS 17	Insurance contracts	January 1, 2023
IAS 8	Definition of accounting estimates	January 1, 2023
IAS 1	Disclosure of accounting policies	January 1, 2023
IAS 12	Deferred taxes related to assets and liabilities arising from a single transaction	January 1, 2023
IAS 12	International tax reform - Pillar Two Model Rules	January 1, 2023

IFRS 17 Insurance Contracts

The IASB issued IFRS 17 Insurance Contracts in May 2017, which is a specific new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. When IFRS 17 becomes effective, it will replace IFRS 4 Insurance Contracts that was issued in 2005. The new standard applies to all insurance contracts, regardless of the issuing entity, and to guarantees and financial instruments with discretionary participation features. Some exceptions within the scope may apply.

In December 2021, the IASB amended IFRS 17 to add a transition option for a "classification overlay" to address potential accounting asymmetries between financial assets and insurance contract liabilities in the comparative information presented on first-time adoption of IFRS 17.

If an entity chooses the classification overlay, it may only do so for the comparative periods when it applies IFRS 17, which is from the transition date to the date of first-time adoption of IFRS 17. IFRS 17 requires comparative figures.

The amendment is applicable for the first time in 2023. However, it does not affect the Company's financial statements.

IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors - Definition of Accounting Estimates

The IASB issued amendments to IAS 8 in February 2021, when it introduced a new definition of "accounting estimates". The amendments clarify the distinction between changes in accounting estimates and changes in accounting policies and the correction of errors. They clarify how entities use measurement techniques and inputs for estimate accounting.

The amended standard clarifies that the effects on an accounting estimate resulting from a change in an input or a change in a measurement technique are changes in accounting estimates, provided that they do not result from the correction of prior period errors. The previous definition of a change in accounting estimate accepted that changes in accounting estimates may arise from new information or new developments. Therefore, such changes are not error corrections.

The amendment is applicable for the first time in 2023. However, it does not affect the Company's financial statements.

IAS 1 Presentation of Financial Statements - Disclosure of Accounting Policies

The IASB issued amendments to IAS 1 and IFRS Practice Statement No. 2 Making Materiality Judgments in February 2021, where it provides guidance and examples to assist entities in applying materiality judgments to accounting policy disclosures.

The amendments are intended to assist entities to formulate disclosures about accounting policies. They are useful as they:

- Replace the requirement for entities to disclose their "significant" accounting policies with the requirement to disclose their "material" accounting policies
- Include guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosures

Require entities to assess the materiality of accounting policy disclosures by considering the size of transactions, other events or conditions and the nature of those events or conditions.

The amendment is applicable for the first time in 2023. However, it does not affect the Company's financial statements.

IAS 12 Deferred taxes related to assets and liabilities arising from a single transaction

In May 2021, the IASB issued amendments to IAS 12, which reduce the scope of the initial recognition exception under IAS 12 so that it no longer applies to transactions that result in equal taxable and deductible temporary differences.

The amendments clarify that when payments that settle a liability are deductible for tax purposes, it is a matter of judgment having considered applicable tax law whether such deductions are attributable for tax purposes to the liability recognized in the financial statements and interest expense, or to the related asset and interest expense. This judgment is important to determine whether there are temporary differences in the initial recognition of assets and liabilities.

Also, the amendments clarify that the initial recognition exception does not apply to transactions that give rise to equal taxable and deductible temporary differences on initial recognition. It only applies if recognizing a lease asset and a lease liability, or a decommissioning liability and a component of the decommissioning asset, gives rise to taxable and deductible temporary differences that are not the same. However, the resulting deferred tax assets and liabilities may not be equal, for example if the entity cannot benefit from tax deductions, or if different tax rates apply to taxable and deductible temporary differences. In this case, an entity would need to account for the difference between the deferred tax asset and the deferred tax liability in the statement of net income.

The amendment is applicable for the first time in 2023. However, it does not affect the Company's financial statements.

IAS 12 International tax reform - Pillar Two Model Rules

On May 23, 2023, the IASB issued amendments to IAS 12, which introduce a mandatory temporary exception to recognize and disclose deferred tax assets and liabilities related to income taxes on the Pillar Two Model Rules. The amendments clarify that IAS 12 applies to income taxes arising from tax law enacted or substantively enacted to implement the Pillar Two Model Rules issued by the Organisation for Economic Co-operation and Development (OECD), including tax law that implements qualified national top-up taxes. This tax law and the associated income taxes are referred to as "Pillar Two legislation" and "Pillar Two income taxes", respectively.

The amendments require an entity to disclose that it has applied the exemption to disclose information about deferred tax assets and liabilities related to its Pillar Two income taxes. An entity is required to separately disclose its current tax expense (income) related to Pillar Two income taxes in effective periods.

During periods when Pillar Two legislation is enacted or substantively enacted but not yet effective, the amendments require the disclosure of known or reasonably estimated information that would assist users of financial statements to understand the entity's exposure to Pillar Two income taxes. An entity is required to comply with these requirements by disclosing qualitative and quantitative information about its Pillar Two income tax exposure as of the end of the reporting period.

The temporary deferred tax recognition and disclosure exemption and the requirement to disclose the exemption apply immediately and retrospectively after the amendments have been issued.

Disclosure of the current tax expense related to Pillar Two income taxes and disclosures in connection with periods prior to the enactment of the legislation are required for annual periods beginning on or after January 1, 2023, but are not required for any interim period ending on or before December 31, 2023.

The amendment is applicable for the first time in 2023. However, it does not affect the Company's financial statements.

- b) New accounting pronouncements covering standards, interpretations and amendments that apply to annual periods beginning on or after January 1, 2024

The new standards, interpretations and amendments to IFRS that have been issued but have not yet taken effect as of the date of these financial statements are detailed below. The Company has not adopted these standards early:

	Amendments	Mandatory application date
IAS 1	Classification of liabilities as current or non-current	January 1, 2024
IFRS 16	Lease liabilities related to a sale and leaseback	January 1, 2024
IAS 7 and IFRS 7	Disclosures regarding supplier finance arrangements	January 1, 2024
IFRS 10 and IAS 28	Consolidated financial statements – sale or contribution of assets between an investor and its associate or joint venture	To be determined

IAS 1 Presentation of Financial Statements - Classification of liabilities as current or non-current

The IASB issued amendments to IAS 1 in 2020 and 2022, to explain how to classify liabilities as current or non-current. The amendments clarify:

1. What is meant by the right to defer payment.
2. That there should be a right to defer at the end of the reporting period.
3. That this classification is not affected by the likelihood that an entity exercises its right to defer.
4. That a liability's terms do not affect its classification, unless an embedded derivative in a convertible liability is itself an equity instrument.

The amendments are effective for annual periods beginning on or after January 1, 2024. The amendments are to be applied prospectively. Earlier application is permitted and must be disclosed. However, an entity that applies the 2020 amendments early is also required to apply the 2022 amendments, and vice versa.

The Company will evaluate the impact of the amendments once they become applicable.

IFRS 16 Lease liabilities related to a sale and leaseback

The amendment addresses the requirements of a seller/lessee to measure the lease liability on a sale and leaseback transaction.

The amendment requires that after a sale and leaseback transaction, the seller/lessee applies paragraphs 29 to 35 of IFRS 16 to the leased right-of-use asset and paragraphs 36 to 46 of IFRS 16 to the corresponding lease liability. The seller/lessee applies paragraphs 36 to 46 of IFRS 16 by calculating the "lease payments" or "revised lease payments" in a manner that leaves the seller/lessee recognizing no gain or loss on its leased right-of-use assets. These requirements do not prevent the seller/lessee from recognizing in the statement of net income any gain or loss on a partial or total lease termination, as required by paragraph 46(a) of IFRS 16.

The amendment does not define the specific measurement requirements for lease liabilities arising from a subsequent lease. The initial measurement of the lease liability on a subsequent lease may result in the seller/lessee calculating "lease payments" that are different from the general definition of lease payments in Appendix A of IFRS 16. The seller/lessee shall prepare and apply an accounting policy that produces information that is relevant and reliable, in accordance with IAS 8.

A seller/lessee can apply this amendment to annual reporting periods beginning on or after January 1, 2024. Earlier application is permitted and should be disclosed. A seller/lessee can apply this amendment retrospectively in accordance with IAS 8 to sale and leaseback transactions signed after the initial application date. This amendment does not apply to sale and leaseback transactions signed before the initial application date. The date of initial application is the beginning of the annual reporting period in which an entity first applied IFRS 16.

The Company will evaluate the impact of the amendments once they become applicable.

IAS 7 and IFRS 7 - Disclosures regarding supplier finance arrangements

In May 2023, the Board issued amendments to IAS 7 Statement of Cash Flows and IFRS 7 Financial Instrument Disclosures. The amendments improve current disclosure requirements, which will assist users of financial statements to understand the effects of supplier finance arrangements on an entity's liabilities, cash flows and liquidity risk exposures.

The amendments clarify the characteristics of supplier finance agreements. These arrangements involve financial services providers paying amounts owed by an entity to its suppliers. The entity agrees to reimburse those amounts to the financial service provider either when the financial service provider pays the entity's suppliers or at a later date, in accordance with the agreement's terms and conditions.

The amendments require an entity to provide information about the impact of supplier finance arrangements on its liabilities and cash flows, including the terms and conditions of those arrangements, quantitative information about the liabilities related to those arrangements at the beginning and end of the reporting period and the effect of non-cash changes in the book values of those arrangements. Information on these agreements must be disclosed in aggregate unless individual agreements have dissimilar or unique terms. Supplier finance arrangements are significant examples of the quantitative liquidity risk disclosures required by IFRS 7.

The amendments are effective for annual periods beginning on or after January 1, 2024. Earlier application is permitted and should be disclosed. The amendments allow for transitional exemptions with respect to comparative and quantitative information at the beginning of the annual reporting period and disclosures in interim financial information.

The Company will evaluate the impact of the amendments once they become applicable.

IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures - sale or contribution of assets between an investor and its associate or joint venture

The amendments to IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures (2011) address an inconsistency between the requirements of IFRS 10 and IAS 28 (2011) in the treatment of the sale or provision of assets between an investor and its associate or joint venture.

The amendments were issued in September 2014, and state that when the transaction involves a business (whether or not in a subsidiary), all the gain or loss is recognized. A partial gain or loss is recognized when the transaction involves assets that do not constitute a business, even when the assets are in a subsidiary.

The mandatory date for applying these amendments is undetermined, as the IASB is awaiting the results of their research project into accounting using the equity method. These amendments should be applied retrospectively and early adoption is permitted, which must be disclosed.

The Company will evaluate the impact of the amendments once they become applicable.

The Company's management believes that the adoption of these standards, amendments and interpretations will have no significant impact on the Company's consolidated financial statements when they are first applied.

2.4 Basis of consolidation

The interim consolidated financial statements of Salmenes Camanchaca S.A. comprise the financial statements of the parent company and its subsidiaries as of June 30, 2023, December 31, 2022 and June 30, 2022. They include assets and liabilities, results and cash flows as of June 30, 2023, December 31, 2022 and June 30, 2022, and have been prepared using consistent accounting policies.

Balances with related companies, income and expenses, and unrealized gains and losses have been eliminated, and the participation of non-controlling investors has been recognized under "Non-controlling interests"

Subsidiaries

Subsidiaries are all entities over which an investor can exercise the right to receive variable returns through this investment and can make decisions regarding those returns through their control over the investee. Specifically, the Group controls a subsidiary if the Group has:

- Authority over the subsidiary or rights that give it the authority to direct the subsidiary's business.
- Exposure or rights to variable returns from its investment in the subsidiary.
- It can influence those returns through its authority over the subsidiary.

Generally, control is assumed to mean the majority of the voting rights. When the group does not hold a majority of the voting rights, or similar rights, in the subsidiary, the group considers all relevant facts and circumstances to assess whether it has control over the subsidiary, including:

- Contractual agreements with other shareholders regarding the subsidiary's voting rights.
- Rights from other contractual agreements.
- Potential group voting rights.

The group evaluates whether it retains control in an investee, if facts and circumstances indicate that there have been changes in one or more of the control criteria described above. Subsidiaries are consolidated from the moment the group obtains control over the subsidiary and consolidation ceases when the group loses control over the subsidiary. The assets, liabilities, income and expenses of a subsidiary that has been acquired or disposed of during the period are included in the consolidated financial statements from the date on which the group obtains control or until the date on which the group loses control.

The net income, losses and each component of other comprehensive income are attributed to the owners of the group's parent company and to external shareholders, even if this means that the external shareholders have a debit balance. When deemed necessary, adjustments are made to the financial statements of subsidiaries so that their accounting policies are consistent with group policies. All assets, liabilities, equity, income, expenses and cash flows arising from transactions between group companies are fully eliminated on consolidation.

The acquisition method is used to account for the acquisition of subsidiaries by the Company. The acquisition cost is the fair value of the assets delivered, equity instruments issued and liabilities incurred or assumed at the date of exchange. Identifiable assets, liabilities and contingencies acquired in a business combination are initially valued at their fair value on the acquisition date, regardless of the extent of minority interests. At each acquisition, the Group recognizes any minority interest at its fair value, or the proportional value of the minority interest over the fair value of the acquired net assets.

The surplus acquisition cost over the fair value of the Company's share of the acquired net identifiable assets is recognized as purchased goodwill. If the purchase price is less than the fair value of the net assets of the acquired subsidiary, the difference is recognized directly in net income.

Intercompany transactions, balances and unrealized gains on transactions between Group entities are eliminated during consolidation. Unrealized losses are also eliminated, unless that transaction provides evidence that the transferred asset is impaired. The accounting policies at subsidiaries are amended as necessary, to ensure that group policies have been consistently adopted.

Salmones Camanchaca S.A. consolidates Fiordo Blanco S.A. as it has a 99.99% interest, and Fiordo Azul S.A. as it directly and indirectly has a 100% interest.

The following subsidiaries are included in these consolidated financial statements, together with their functional currency:

Consolidated company	Country	Functional Currency	Ownership interest		06/30/2023	12/31/2022
			Direct %	Indirect %	Total %	Total %
Fiordo Blanco S.A.	Chile	US dollar	99.99	-	99.99	99.99
Fiordo Azul S.A.	Chile	US dollar	99.99	0.01	100.00	-

2.5 Investments in associates

Associates are defined as entities over which the Company exercises significant influence but does not control the financial and operational policies. It generally has an interest in the voting rights of between 20% and 50%. Investments in associates are accounted for using the equity method and are initially recognized at cost.

The Salmones Camanchaca S.A. share of net income or losses in associates subsequent to acquiring them are recognized in net income, and its share of equity movements (that are not due to net income) subsequent to their acquisition are recognized in reserves, and reflected as appropriate in the statement of comprehensive income. When the Company's share of an associate's losses is equal to or greater than its interest in that company, including any other unsecured receivables, the Company does not recognize further losses unless it has incurred obligations or made payments on behalf of that associate.

Unrealized gains on transactions between Salmones Camanchaca S.A. and its associates are eliminated according to the Company's percentage interest in them. Unrealized losses are also eliminated, unless the transaction provides evidence of impairment of the transferred asset.

- Surproceso S.A is a company that provides aquaculture services. It has a commercial relationship with Salmones Camanchaca S.A. providing it with slaughtering and gutting services, who also owns a 33.3% interest.

2.6 Segment reporting.

IFRS 8 requires entities to adopt "Management's approach" when disclosing information about the outcome of their operating segments. In general, this is the information that Management uses internally to evaluate segment performance and to allocate resources to segments.

Salmones Camanchaca S.A. has only one operating segment, according to this standard.

2.7 Foreign currency transactions

a) Presentation currency

The Company's financial statements are presented in US dollars, which is the functional currency of the parent company and the group's presentation currency.

b) Functional currency

Based on the instructions and definitions provided in IAS 21, functional currency is "the currency of the primary economic environment in which the entity operates".

Therefore, the Company has established that the conditions that support the functional currency are as follows.

Factors	Currency
The currency that primarily influences the selling prices of goods and services; normally the price used to describe and pay for them.	US dollar ¹
The currency that principally affects the costs of labor, materials and other costs to produce goods or provide services, normally the price used to describe and pay for such costs.	US dollar and Chilean peso ²
The currency used to collect receipts for billed operational activities.	US dollar

The following aspects were also considered when selecting the Company's functional currency.

- The currency used by the Company's financing activities, such as bank obligations and equity, is the US dollar.
- The currency primarily used to invest the receipts from the Company's billed operational activities is the US dollar.

Therefore, the Company considers that, under the current circumstances the functional currency of Salmones Camanchaca S.A. is the US dollar.

c) Transactions and balances

Transactions in foreign currencies other than the functional currency are translated to the functional currency using the exchange rate in effect as of the transaction date. Gains and losses on foreign currencies resulting from settling these transactions, and the conversion at closing rates of those monetary assets and liabilities denominated in foreign currency, are recognized in the statement of net income under "Exchange differences".

The assets and liabilities of a subsidiary or associate, whose functional currency is different from that of the group but is not that of a hyperinflationary economy, are translated on consolidation into US dollars at the exchange rate in effect on the closing date and the statements of net income are translated at the average monthly exchange rate. Exchange differences arising on translation are recognized in other comprehensive income. When a foreign investment is disposed of, the component of other comprehensive income relating to that investment is reclassified to the statement of net income.

¹ US dollar

² Chilean peso

d) Exchange rates

The exchange rates of foreign currencies and the Unidad de Fomento (an inflation-indexed, Chilean monetary unit) as compared to the Chilean peso as of June 30, 2023, December 31, 2022 and June 30, 2022 were as follows:

Date	CLP / USD	UF / USD	EUR / USD	YEN / USD	NOK / USD
06/30/2023	801.66	0.0222	0.9164	144.2786	10.7249
12/31/2022	855.86	0.0244	0.9344	131.3200	9.8243
06/30/2022	932.08	0.0282	0.9543	135.6400	9.8396

2.8 Property, plant, and equipment

The Company's property, plant and equipment is made up of land, building, infrastructure, machinery, equipment and other fixed assets. The main types of property, plant and equipment are: Production plants, marine equipment (pontoons), hatcheries and grow-out sites.

Land, buildings, plants, equipment and machinery are recognized at their historical cost less depreciation. Historical cost includes the fair value considered to be attributed cost according to IFRS 1. This historical cost includes expenditure that is directly attributed to acquiring the asset.

Subsequent costs are included in the initial value of the asset, or recognized as a separate asset, only when it is likely that the future financial benefits associated with these components will flow to the Company and the cost of these components can be determined reliably. The value of the replaced component is expensed.

Replacement or overhaul of whole components that increase the asset's useful life, or its economic capacity, are recorded as an increase in value for the respective assets, while derecognizing the replaced or overhauled components.

Depreciation of other items of property, plant and equipment is calculated using the straight-line method, in order to allocate their cost over their estimated technical useful lives.

	Years
Buildings	10 - 50
Plant and equipment	3 - 20
Vessels	50
Vehicles	7 - 10
Other fixed assets	3 - 10
Right-of-use assets	3

The residual value and useful life of these assets are reviewed and adjusted when necessary at each reporting date.

When the book value of an asset is greater than its estimated recoverable value, its book value is immediately reduced to its recoverable value.

Losses and gains on the sale of property, plant and equipment are calculated by comparing proceeds obtained to book value and are included in the statement of income.

Right-of-use assets includes assets for service contracts that qualify as financial leases under the parameters established by IFRS 16, as of June 30, 2023.

2.9 Biological assets

Biological assets include the following.

Biological assets include groups of breeders, eggs, smolts and fish at marine grow-out sites. They are evaluated at initial recognition and subsequently.

Live fish inventories at all their freshwater stages, which are breeders, eggs, fry and smolts. These are valued at accumulated cost as of the reporting date.

The fair value valuation criteria for fish at marine grow-out sites includes the value of the concession as a component of the farming risk, in accordance with the definition in IAS 41. Therefore, a valuation model has been adopted that calculates the fair value adjustment by applying a risk factor to the expected biomass margin at each marine grow-out site. An exponential model is used and the risk factor discounts the expected biomass margin.

The estimated fair value of fish biomass is based on the following: (i) volume of fish biomass, (ii) average biomass weights, (iii) cumulative biomass costs for each site, (iv) estimated remaining costs, and (v) estimated sales prices.

Volume of fish biomass

The volume of fish biomass is an estimate based on the number of smolts in the sea, an estimate of their growth, identified mortality in the period, average weights, and other factors. Uncertainty with respect to the volume of biomass is normally lower in the absence of bulk mortality events during the cycle, or if the fish catch acute diseases.

The biomass is the weight when it is calculated for each farming site. The target harvest weight depends on each site.

Cumulative Costs

Cumulative costs for farming sites at the date of the fair value calculation are obtained from the Company's accounts.

Remaining Costs

Estimated remaining costs are based on the forecast direct and indirect costs that will affect the biomass at each site through to final harvest.

This estimate is refined at each calculation, and uncertainty reduces as the harvest approaches.

Operating revenue

Operating revenue is calculated using several sales prices forecast by the Company for each month based on future price information from public sources, adjusted to historical price behavior from the main destination market for our fish. This is reduced by the costs of harvesting, processing, packaging, distribution and sale.

A fair value adjustment is applied to all fish at marine grow-out sites, under the current model. Changes in the fair value of biological assets are recorded in the statement of net income for the period.

All biological assets are classified as current biological assets, as they form part of the normal farming cycle that concludes with harvesting the fish.

The gain or loss on the sale of these assets may vary in comparison to their calculated fair value as of the reporting date.

The Company uses the following method.

Stage	Asset	Valuation
Fresh water	Eggs, fry, smolts and breeders	Direct and indirect cumulative costs at their various stages.
Sea water	Salmon	Fair value includes prices, costs and volumes that are estimated by the Company.

Hierarchy

Fair value hierarchy is determined according to the data source, according to the IFRS 13. The Company's valuation model uses hierarchy level III. The most significant unobserved variables are the sales price and the average weight.

2.10 Intangible assets other than goodwill

Individually acquired intangible assets are initially measured at cost. The cost of intangible assets acquired in a business combination is their fair value as of the date of acquisition. After initial recognition, intangible assets are recorded at cost less any accumulated amortization and any accumulated impairment loss. Internally generated intangible assets, excluding capitalized development expenditure, are not capitalized and the related expense is recognized in the statement of net income for that period.

a) Aquaculture concessions

Aquaculture concessions have an indefinite useful life, because they have no expiry date nor a measurable useful life. Therefore, they are not amortized. This status of indefinite useful life is reviewed at each reporting date, in order to assess whether events and circumstances continue to support an indefinite useful life for that asset. These assets undergo impairment testing on a yearly basis.

b) Water Rights

The Company analyzed the useful lives of these intangible assets and concluded that there is no foreseeable limit to the period over which they will generate net cash flow. Therefore, these intangible assets have indefinite useful lives.

c) Computer software

Licenses for purchased software are capitalized on the basis of the costs incurred to purchase and prepare them for use. These costs are amortized over their estimated useful lives. Expenditure on developing or maintaining software is expensed as it is incurred. Costs directly associated with producing unique and identifiable computer software controlled by the Company that are likely to generate financial benefits that exceed their costs for more than a year, are recorded as intangible assets.

Direct costs include expenses for employees that develop the software and an appropriate percentage of general expenses.

d) Research and development expenses

Research expenses are expensed when incurred. The directly attributable costs of development projects relate to the design and testing of new or improved products. These are recognized as intangible assets when the following criteria are met.

- It is technically feasible to fully produce the intangible asset, to the point where it can be used or sold.
- Management intends to complete the intangible asset, and to use or sell it.
- The Company has the ability to use or sell it.

- The Company can demonstrate how the intangible asset is likely to generate financial benefits in the future.
- The Company has sufficient technical, financial or other resources, to complete development and to use or sell the intangible asset.
- The expenditure attributable to developing it can be reliably measured.

2.11 Interest costs

Interest costs incurred in the construction of any qualified asset are capitalized over the period of time needed to complete and prepare the asset for its intended use. Other interest costs are expensed.

2.12 Impairment losses on non-financial assets

Assets with indefinite useful lives are not amortized and are tested yearly for impairment losses. Amortized assets are tested for impairment whenever an event or change in circumstances indicates that their book value may not be recoverable. An impairment loss is recognized for the amount by which the asset's book value exceeds its recoverable value. The recoverable value is the greater of the fair value of an asset less the costs to sell it, or its value in use. Impairment is assessed by grouping assets at the lowest levels at which they generate separately identifiable cash flows (cash-generating units).

Salmones Camanchaca S.A. uses value in use to calculate the recoverable value. Value in use is based on estimated future cash flows that are discounted to present value using a before-tax discount rate that reflects current market assessments of the time value of money and any asset specific risks.

All non-financial assets are evaluated at each closing date to determine whether there is any indication that the impairment loss recorded in previous periods no longer exists or has decreased. If such an indication is found, the Company estimates the recoverable value of the asset or the cash-generating units. A previously recorded impairment loss is reversed only if there has been a change in the assumptions used to determine the recoverable value since the last impairment loss was recorded. The reversal is limited to ensuring that the book value of the asset does not exceed its recoverable value, nor does it exceed its original book value net of depreciation had no impairment loss been recognized in previous periods. This reversal is recorded in the statement of net income unless the asset is carried at a revalued value, in which case the reversal is recorded as an increase in the revaluation.

Intangible assets with an indefinite useful life at December 31 are tested annually for impairment. This applies to both individual assets and cash-generating units, as appropriate, and when circumstances indicate that the book value may be impaired.

2.13 Financial assets and liabilities

Financial Assets

Financial assets within the scope of IFRS 9 are classified according to the business model used by the group to manage its financial instruments and contractually established cash flows.

Financial investments not classified at fair value through profit and loss are initially recognized at fair value plus directly attributable transaction costs.

The Company evaluates whether embedded derivatives exist in contracts or financial instruments, to determine whether their characteristics and risk are closely related to the principal contract provided that in aggregate they are not being accounted for at fair value. If they are not closely related, they are recorded separately and changes in value are accounted for directly in the statement of comprehensive income.

The Company and its subsidiaries classify their financial assets after initial recognition and, when permitted and appropriate, reassess this classification as of each financial period end. All regular purchases and sales of financial assets are recognized on the trade date, which is the date on which the Company becomes committed to the trade. Regular purchases and sales are purchases or sales of financial assets that require assets to be delivered within the time frame established generally by regulation or market convention. The following investment classifications are used:

- a) Financial assets at fair value through profit and loss - Financial assets at fair value through profit and loss include financial assets held for sale and financial assets initially recognized at fair value through profit and loss.

Financial assets are classified as held for sale if they are acquired for the purpose of selling them in the short term.

Derivatives, including any separate embedded derivatives, are also classified as held for sale, unless designated as effective hedging instruments, or as financial guarantee contracts. Gains or losses on held-for-sale instruments are recognized in the net income statement.

When a contract contains one or more embedded derivatives, the entire hybrid contract can be designated as a financial asset at fair value through profit and loss except when the embedded derivative does not significantly change cash flow, or it is clear that separation of the embedded derivative is prohibited.

- b) Financial assets measured at amortized cost - The entity measures assets at amortized cost when the asset complies with the following two conditions: i. The financial asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows, and ii. The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.
- c) Financial assets at fair value with changes in other comprehensive income - Financial assets are measured at fair value with changes in other comprehensive income if they meet the following two conditions: (i) They are held in a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, and (ii) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.
- d) Derivative and hedge financial instruments - Derivative financial instruments to hedge risks associated with fluctuations in interest rates and exchange rates are initially recognized at fair value at the date the derivative contract is signed and are subsequently valued at fair value. Derivatives are recorded as assets (other financial assets) when their fair value is positive and as liabilities (other financial liabilities) when their fair value is negative.

Financial liabilities

Debt and equity instruments are classified as either financial liabilities or equity, based on the substance of the contractual agreement.

Equity instruments - An equity instrument is any contract that evidences a residual interest in the assets of a company after deducting all of its liabilities. Equity instruments are recorded at the value of the consideration received, net of direct issuance costs.

Financial liabilities – Financial liabilities are classified either as financial liabilities “at fair value through profit and loss”, or as “other financial liabilities”.

- a) Financial liabilities are classified at fair value through profit and loss when these are held for sale or are designated as such.
- b) Other financial liabilities, including loans, are valued initially at the amount of cash received, net of transaction costs. Other financial liabilities are subsequently valued at amortized cost using the effective interest rate method, recognizing interest expense on an effective rate basis.

The effective interest rate method is a method of calculating the amortized cost of a financial liability and of allocating interest expense throughout the corresponding period. The effective interest rate is the rate that

exactly discounts the estimated cash flows payable over the expected life of the financial liability, or when appropriate, a shorter period when the associated liability has a prepayment option that is expected to be exercised.

The accounting treatment of a debt renegotiation in accordance with IFRS 9 depends on whether the contractual terms are substantially modified, defined as whether the effects of the renegotiation differ by more than 10%.

- If they differ by less than 10%, then the debt renegotiation results in a non-substantial modification. The value of cash flows for the renegotiated debt are calculated after discounting them at the effective interest rate for the original debt. Any difference between this discounted value and the book value of the debt is recognized in the net income statement and the effective interest rate is adjusted prospectively to include new costs and commissions that qualify as "transaction costs". These must be directly attributable to the purchase, issue or disposal of a financial liability, or those that would have been incurred had the respective financial instrument been generated.
- If they differ by more than 10%, then the debt renegotiation results in a substantial modification, where the original debt is eliminated and replaced by the new one. The original debt is derecognized, the new debt is recognized at fair value, and any difference is recognized in the net income statement when the debt is restructured.

2.14 Inventories

Inventory is valued at its cost or net realizable value, whichever is lower. Cost is calculated using the average cost method.

The cost of finished and in-process products includes the costs of raw materials, direct labor, other direct costs and general manufacturing expenses, based on normal operating capacity, but excluding interest.

Inventory transformation costs include costs directly related to production, such as direct labor. They also include a systematic distribution of the variable or fixed indirect production costs to transform raw materials into finished products. Fixed indirect production costs remain relatively constant, regardless of production volumes, such as depreciation and maintenance of buildings, equipment and right-of-use leased assets used in production, as well as plant management costs. Variable indirect production costs vary directly, or almost directly, with production volumes, such as materials and indirect labor.

Net realizable value is the estimated sales price during the normal course of business, less variable sales costs.

Obsolete or slow-moving products are recognized at their recoverable value.

Subsequent storage costs or costs incurred in delivering products to customers are not included in inventory costs.

Commercial discounts, rebates and other similar adjustments are deducted to arrive at the purchase cost.

Net realizable value is the estimated sales price less all estimated finishing costs and sales and marketing costs.

The Company evaluates the net realizable value of inventories at the end of each period and adjusts their book value if necessary.

Inventory valuation policy

a) The Company values its inventories as follows.

- i) The production cost of manufactured inventory includes all costs related to the units produced such as labor and fixed and variable costs required to transform raw materials into finished products.

The production cost of fresh and frozen salmon is based on the last fair value of biological asset when harvested, plus direct and indirect production costs.

ii) The acquisition cost of purchased inventory includes its purchase cost, customs fees, transport, storage and other costs attributable to its acquisition.

b) Inventory cost calculation formula

Inventories of finished products are valued using the weighted average cost, ie. the cost of each product unit is based on the weighted average cost at the beginning of the period, and the cost of items purchased or produced during the period.

Inventories of raw materials and packaging are valued at weighted average cost.

2.15 Statement of Cash Flow

The Company has defined the following policies in order to prepare the statement of cash flow:

Cash and cash equivalents include cash on hand, at banks, term deposits with financial institutions, mutual funds and other short-term, highly liquid investments that are readily realizable, with a low risk of changes in value and an original maturity of up to three months. Bank overdrafts are classified as third-party resources within current liabilities in the statement of financial position.

- i. Operating Activities: These are the group's principal source of operating revenue as well as other activities that cannot be classified as investing or financing.
- ii. Investing Activities: These are the acquisition and disposal by any means of long-term assets and other investments not included in cash and cash equivalents.
- iii. Financing Activities: These cause changes in the size and composition of equity and financial liabilities.

2.16 Classification of Current and Non-Current Balances

The Company presents assets and liabilities in the statement of financial position on a current or non-current basis. An asset is classified as current when:

- The Company expects to recover, consume or sell it during its normal operating cycle
- The Company principally holds it for trading purposes
- The Company expects to recover it within twelve months of the reporting date
- It is cash or cash equivalent, unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.

The Company classifies all other assets as non-current assets.

A liability is classified as current when:

- The Company expects to settle it during its normal operating cycle;
- The Company principally holds it trading purposes
- The Company expects to settle it within twelve months from the reporting date
- The Company does not have an unconditional right to defer settlement for at least twelve months after the reporting date. If a counterparty holds an option that could result in the settlement of the liability by issuing equity instruments, this will not affect its classification. The Company classifies all other liabilities as non-current liabilities.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

2.17 Earnings per Share

Basic earnings per share is calculated as the ratio between net income for the period divided by the weighted average number of ordinary shares in circulation during that period.

2.18 Trade and other receivables

Trade receivables are initially recognized at fair value (nominal value including implicit interest), and they are subsequently recognized at their amortized cost according to the effective interest rate method, less provisions for impairment losses.

Implicit interest must be disaggregated and recognized as financial income to the extent that such interest has accrued.

The provision is the difference between the asset's book value and the present value of its estimated future cash flows, discounted using the effective interest rate.

However, if the difference between the nominal value and the fair value is not significant, the nominal value is used.

The Company applies the simplified approach of IFRS 9 to measure expected credit losses using an expected loss provision over the life of the instrument for all receivables.

Expected credit losses are measured by grouping receivables by their shared credit risk characteristics and days overdue. Historical loss rates are adjusted to reflect current and expected information regarding macroeconomic factors that affect the ability of customers to meet their commitments.

2.19 Cash and cash equivalents

Cash and cash equivalents include cash on hand, term deposits with financial institutions, other highly liquid short-term investments that can be readily converted into known amounts of cash that are subject to a negligible risk of changes in value and have a maturity of three months or less on their acquisition date.

Bank overdrafts are included in current financial liabilities in the consolidated statements of financial position, when appropriate.

2.20 Share capital

Share capital is represented by ordinary shares.

Incremental costs directly attributable to new share issues or options are presented in net equity as a deduction from their proceeds.

Legal minimum dividends on ordinary shares are recognized as a reduction in equity when they are accrued.

2.21 Trade and other payables, current

Trade payables are initially recognized at fair value and subsequently at amortized cost using the effective interest rate method.

However, similarly to trade receivables, if the difference between the nominal value and the fair value is not significant, the nominal value is used.

2.22 Current and deferred income taxes

The tax expense on net income for the period includes current income tax and deferred tax.

Current income taxes are based on the tax laws as of the reporting date.

Deferred taxes are calculated using the liability method on temporary differences that arise between the tax value of assets and liabilities and their book values. However, if deferred taxes arise from the initial recognition of a liability or an asset in a transaction other than a business combination, which at the time of the transaction do not affect accounting net income nor taxable profit, then they are not accounted for.

Deferred tax is calculated using the current tax rates and laws, or those about to be approved as of the reporting date, which are likely to be applicable when the corresponding deferred tax asset is collected or deferred tax liability is settled.

Deferred tax assets are recognized to the extent that it is likely that future tax benefits are available to offset such temporary differences.

An entity must offset deferred tax assets with deferred tax liabilities only if the tax authority recognizes that it has the legal right to offset the amounts recognized in those items; and the deferred tax assets and liabilities arise from income taxes levied by the same tax authority on the same entity or taxpayer, or on different entities or taxpayers that intend either to settle current tax assets and liabilities on a net basis or to simultaneously recover the assets and pay the liabilities in each of the future periods in which significant amounts of deferred tax assets or liabilities are expected to be paid or recovered.

Current and deferred income taxes are recognized in the statement of net income, except for taxes arising on items recognized in other comprehensive income, directly in equity, or on a business combination. In which case, the corresponding tax is also recognized in other comprehensive income, directly in the statement of net income, or in commercial goodwill, respectively.

2.23 Employee benefits

a) Staff vacations

The Company recognizes the expense for staff vacations using the accrual method, which is recorded at its nominal value. The staff vacation benefit does not represent a significant amount in the statement of comprehensive income.

b) Severance indemnities

This liability is the present value of defined benefit obligations as of the reporting date. It is calculated annually using actuarial assumptions and by discounting the corresponding estimated cash flows. Gains and losses arising from adjustments due to changes in trends of actuarial assumptions are recognized immediately in the statement of financial position with a charge or credit, as appropriate, to reserves through other comprehensive income in the period in which they occur. These changes are not reclassified to the statement of net income in subsequent periods.

The parameters used in the actuarial valuation model are as follows: mortality and invalidity rates, discount rates, salary growth rates and staff turnover rates due to resignations.

2.24 Provisions

Provisions are recognized when:

i) The Company has a legal or implicit obligation, as a result of past events.

- ii) It is likely that a disbursement will be necessary to settle the obligation.
- iii) The amount can be reliably estimated.
- iv) Provisions are measured at the present value of Management's best estimate of the expenditures required to settle the obligation. The discount rate used to calculate the present value reflects current market assessments as of the reporting date of the time value of money, as well as any specific risks related to the particular liability.
- v) Legal provisions arise from a contract, legislation or other legal cause.
- vi) Site closure provisions are reliable estimates of the expenditure required to make sites operational for the next harvest cycle.

2.25 Revenue recognition

Revenue is recorded at the fair value of the consideration received or receivable derived from that revenue. The Company takes into consideration all the relevant facts and circumstances when applying each step of the model established by IFRS 15 regarding customer contracts: (i) identify the contract, (ii) identify the performance obligations, (iii) determine the transaction price, (iv) assign the transaction price to the performance obligations, and (v) revenue recognition. The Company also assesses any incremental costs that arise from winning a contract and any costs directly related to fulfilling a contract. The Company recognizes revenue when the steps set out in this IFRS have been successfully completed.

(i) Operating revenue recognition from the sale of goods

Revenue from the sale of goods is recognized when the Company has transferred control over the goods sold to the buyer; when revenue can be reliably measured; when the Company cannot influence how the goods sold are managed; when the Company is likely to receive the financial benefits of the transaction; and when the transaction costs can be reliably measured.

Revenue is based on the price established in the sale agreement, net of volume discounts as of the sale date. There is no significant funding component, as sales proceeds are collected within a reduced average period, which is in line with market practice.

Revenue from export sales is based on Incoterms 2010, which are official regulations for interpreting trade terms, and they are issued by the International Chamber of Commerce.

The principal Incoterms used by the Company are as follows:

"CFR (Cost and Freight)", where the Company is responsible for all costs, including principal transport costs, until the goods arrive at the destination port. Risk is transferred to the buyer when the goods are loaded onto the ship, in the country of origin.

"CIF (Cost, Insurance and Freight)", where the Company arranges and pays the foreign transportation costs and other costs. The Company ceases to be responsible for the goods once they have been delivered to the maritime or air carrier, in accordance with the corresponding deadline. The sale is complete when the goods are delivered to the carrier. This service is arranged by the seller.

FOB (Free on Board) and similar, where the buyer arranges and pays the transport costs. Therefore, the sale is complete when the goods are delivered to the carrier arranged by the buyer.

(ii) Operating revenue recognition for providing services

Revenue from providing services is recognized when the performance obligation has been satisfied. Revenue is accounted for considering the degree of service completion as of the closing date, and whether the Company has an enforceable right to payment for providing those services.

2.26 Leasing

When a contract begins, the Company assesses whether the contract contains a lease, defined as whether the contract gives the right to control the use of an identified asset for a period of time in exchange for consideration. A contract gives Salmenes Camanchaca S.A. the right to control the use of an identified asset if:

- i) The contract involves the explicit or implicit use of an identified asset. If the supplier has a substantial right of substitution, then the asset is not identified;
- ii) The Company has the right to receive substantially all the financial benefits from using the asset during the period; and
- iii) The Company has the right to direct the use of the asset. This right is exercised when significant decisions are taken, for example how and why the asset is used. In exceptional cases, the decision on how and why the asset is used is predetermined. The Company has the right to direct the use of the asset if it has the right to operate the asset, or if it designed the asset in a manner that predetermines how and why it will be used.

At the beginning or revaluation of a contract containing a lease component, the Company assigns the consideration in the contract to each lease component on the basis of its independent relative prices, by separately allocating the associated cost of capital.

a) Lessee

Salmenes Camanchaca S.A. recognizes a right-of-use asset and a lease liability when the lease begins. The right-of-use asset is initially valued at cost, which comprises the initial lease liability adjusted for any lease payments made on or before the start date, plus any initial direct costs and an estimate of the costs to dismantle and eliminate the underlying asset or to restore the underlying asset or the site where it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the start date to the end of its estimated useful life according to the contract term. The estimated useful lives of right-of-use assets are determined by considering future renewals according to the contract term. The value of a right-of-use asset is regularly evaluated and reduced by any impairment losses, and adjusted for specific new valuations of the lease liability.

The lease liability is initially valued at the present value of future payments, discounted using the interest rate implicit in the lease, or if that rate cannot be readily determined, the Company's borrowing rate, incorporating additional adjustments considering the risk of the country and each of the subsidiaries.

Lease payments included in valuing the lease liability comprise the following:

- Fixed payments, included in the contract.
- The exercise price under a purchase option that the Company may reasonably exercise.
- Lease payments on an optional renewal period if the Company is reasonably certain to exercise the renewal option.
- Penalties for early termination of a lease, unless the Company is reasonably certain that it will not terminate the lease early.

The lease liability is valued at amortized cost using the effective interest method. It is revalued when there is a change in future lease payments due to a change in an index or rate.

When the lease liability is accordingly revalued, the book value of the right-of-use asset is adjusted, unless this reaches zero, in which case the adjustment is recognized in the statement of net income.

The Company presents right-of-use assets in "Property, plant and equipment" and the associated obligations in "Lease liabilities, current and non-current" within the consolidated statement of financial position.

The Company has elected not to recognize right-of-use assets and lease liabilities for contracts with a term of 12 months or less, and for contracts whose assets have a value under US\$5,000. The Company recognizes the lease payments associated with these transactions as a straight-line expense over the contract term.

The lease incentives received were recognized as an integral part of the total lease expense during the contract term.

b) Lessor

The Company as a lessor determined whether each contract was a finance lease or an operating lease when the lease contract began. The Company's accounting policies as lessor in the comparative period are as stipulated by IFRS 16.

2.27 Dividend policy

The Company has defined the following dividend policy, in accordance with its by-laws.

Financial statements shall be prepared as of December thirty-one each year. Net distributable income for the year will be distributed as follows.

- a) No less than thirty percent to be distributed as a dividend in cash to shareholders, in proportion to their shares.
- b) The balance to be used to form reserves, as agreed by the Annual General Shareholders' Meeting.

Distributions of dividends to shareholders are recognized as a liability as of each reporting date, in accordance with the dividend policy agreed upon by shareholders at the ordinary general shareholders' meeting.

2.28 The Environment

The disbursements associated with improvements and investments in productive processes that improve environmental conditions are recorded as an expense or investment in the period in which they arise. When these disbursements are part of investment projects, they are recorded as increases to property, plant and equipment.

The Company has established the following disbursements for environmental protection projects.

- a) Disbursements relating to improvements and investments in productive processes that improve environmental conditions.
- b) Disbursements relating to verifying and monitoring regulations and laws covering industrial processes and facilities.
- c) Other disbursements that affect the environment.

2.29 Fair value calculation

The Company revalues financial instruments such as derivatives, and non-financial assets such as biological assets, at fair value as of the reporting date.

Fair value is the value received for selling an asset or paid for settling a liability in an orderly transaction between market participants on the transaction date. Fair value is based on the assumption that the transaction that triggers the asset sale or liability payment takes place:

- In the principal market for that asset or liability, or
- In the absence of a principal market, in the most advantageous market for the transaction of such assets or liabilities

The main or most advantageous market must be a market accessible to the Company.

The fair value of an asset or liability assumes that market participants would use that value when making an offer for that asset or liability, assuming that those market participants are acting in their own financial interest.

The calculation of the fair value of a non-financial asset takes into consideration the ability of market participants to generate financial benefits from the best use of the asset or through its sale to another market participant that could make the best use of the asset.

The Company uses valuation techniques that are appropriate in the circumstances, where sufficient information is available to calculate fair value, and prefers to use significant observable inputs instead of unobservable inputs.

All assets and liabilities valued at fair value in the financial statements are categorized within the fair value hierarchy described below, based on the smallest input that is significant to the fair value calculation as a whole:

- Level 1- Listed (unadjusted) price in an active market for identical assets and liabilities.
- Level 2- Valuation techniques where the lowest level variable that is significant for the calculation is directly or indirectly observable.
- Level 3- Valuation techniques where the lowest level variable that is significant for the calculation is not observable.

The Group assesses whether there have been transfers between hierarchy levels of assets and liabilities valued at fair value in the financial statements on a recurring basis, by reviewing their categorization based on the lowest level input that is significant to the fair value calculation as a whole at the end of each reporting period.

2.30 Investments under the Austral Law

A tax credit for investments in the extreme north and south of Chile. Taxpayers who invest in the XV, XI and XII Regions and in Palena province in the X Region can offset a percentage of their investment against their corporate income tax for the respective year, which is calculated in accordance with current regulations.

Investments that qualify for this benefit must be investment projects, which may be the acquisition or construction by a company of the following physical assets, provided they are depreciable and are directly related to producing goods or providing services for the taxpayer's business:

- New constructions, excluding the value of the land, built directly by the taxpayer or by third party companies. These constructions may be real estate intended primarily for commercial use.
- Machinery and equipment acquired new, or constructed by the taxpayer

NOTE 3 – FINANCIAL RISK MANAGEMENT

The Company's business is exposed to a variety of financial risks, including credit risk, liquidity risk and market risk.

3.1. Credit risk

Credit risk is the risk that a counterparty fails to meet its obligations arising from a financial instrument or purchase contract and this results in a financial loss. The Company's operating activities are exposed to credit risk mainly within trade receivables, which is shown in Note 7 - Trade and other receivables.

a) Customer portfolio risk

The Company has no customers in arrears but not impaired as of the reporting date.

b) Sales risk

The Company uses the usual tools operating in the industry to market its products. These are contracted with recognized and qualified insurance companies and financial institutions. These agreements are insurance policies covering credit, transport and cargo, confirmation of letters of credit, etc. Where collection is directly performed by the Company, this is substantiated by a long-term business relationship, a full record of payment behavior and recognized financial solvency.

The Company has established policies to ensure that product sales on credit are made to customers with an appropriate credit history. The Company mostly sells into the wholesale market, and export sales are supported by letters of credit. Domestic sales are preferably to customers with an appropriate credit history.

3.2. Liquidity risk

The Company's liquidity risks arise from a shortfall of funds for operating costs, financial costs, investments, debt repayments and dividends, compared to its sources. This risk is mitigated through prudent liquidity management, which involves holding sufficient cash and marketable securities, together with balanced bank financing.

Capital and interest commitments over the terms of bank loans and other commitments are as follows.

a) As of June 30, 2023

Description	1 to 3 months ThUS\$	3 to 12 months ThUS\$	1 to 5 years ThUS\$	ThUS\$
Interest-bearing loans	-	14,236	122,472	136,708
Trade and other payables	68,357	20,760	72	89,189
Related party payables, current	1,346	-	-	1,346
Total	69,703	24,996	132,544	227,243

b) As of December 31, 2022

Description	1 to 3 months ThUS\$	3 to 12 months ThUS\$	1 to 5 years ThUS\$	ThUS\$
Interest-bearing loans	-	7,687	121,541	129,228
Trade and other payables	53,637	18,235	157	72,029
Related party payables, current	9,971	-	-	9,971
Total	63,608	25,922	121,698	211,228

3.3. Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument may fluctuate because of changes in market prices. Market risk comprises exchange rate risk and interest rate risk.

a) Exchange rate risk

Exchange rate risk is the risk that the fair value of future cash flows of a financial instrument may fluctuate because of changes in exchange rates.

The Company has defined the US dollar as its functional currency, therefore, it is exposed to exchange rate risk on transactions in Chilean pesos. The exchange rate risk arises on planned commercial transactions, and on assets and liabilities held in Chilean pesos.

The Company has a net liability in Chilean pesos as of June 30, 2023 totaling ThUS\$ 16,650 (net asset of ThUS\$ 13,338 as of December 31, 2022). Therefore, an increase of 5% in the exchange rate results in an exchange gain of ThUS\$ 883 (loss of ThUS\$ 667 as of December 31, 2022), while a decrease of 5% in the exchange rate results in an exchange loss of the same amount.

b) Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument may fluctuate because of changes in market interest rates.

The Company is exposed to interest rate risks, since its long-term financing is at a variable interest rate, which is amended every six months.

The Company has a total of ThUS\$ 106,577 in bank liabilities denominated in US dollars as of June 30, 2023 (ThUS\$ 95,865 as of December 31, 2022). Sensitivity analysis on the interest rates for bank loans reveal that a 1% pa movement in interest rates as of the reporting date would result in additional or lower interest costs of ThUS\$ 1,066 (ThUS\$ 959 as of December 31, 2022), as appropriate.

NOTE 4 – FINANCIAL INSTRUMENTS

The Company has financial instruments as of June 30, 2023 and December 31, 2022 valued at their fair value as shown in the following table, and there are no differences between their fair value and book value.

Item	06/30/2023		12/31/2022	
	Book value ThUS\$	Fair value ThUS\$	Book value ThUS\$	Fair value ThUS\$
Financial assets at fair value through profit and loss				
Cash and cash equivalents				
Cash balances	74	74	69	69
Bank balances	7,420	7,420	20,722	20,722
Financial assets at amortized cost				
Other financial assets (ii)	58	58	54	54
Trade and other receivables (i)	6,500	6,500	14,684	14,684
Related party receivables (i)	44,360	44,360	43,374	43,374
Other financial assets, non-current	112	112	112	112
Recoverable rights, non-current (ii)	5,052	5,052	4,978	4,978
Financial liabilities at amortized cost				
Other financial liabilities (iv)	9,762	9,762	909	909
Lease liabilities (iii)	245	245	370	370
Trade and other payables, current (iv)	89,117	89,117	71,872	71,872
Related party payables (iv)	1,346	1,346	9,971	9,971
Other financial liabilities, non-current	96,815	96,815	94,956	94,956
Lease liabilities, non-current (iii)	383	383	405	405
Trade and other payables, non-current (iii)	72	72	157	157

(i) Trade and other receivables

Trade and other receivables are amounts owed by customers for goods sold or services rendered in the ordinary course of business. They are usually settled within a period of 30 to 90 days, so are classified as current. Trade and other receivables are initially recognized at the value of the unconditional commitment, unless they contain significant financing components, in which case they are recognized at fair value. The Company accepts trade and other receivables with the objective of collecting the corresponding contractual cash flows and subsequently values them at amortized cost using the effective interest method. The details of the Company's impairment policies and its impairment loss provision calculations are included in Note 7 (Trade and other receivables).

The book values of trade and other receivables are treated as equal to their fair values, due to their short-term nature.

Information about the impairment of trade and other receivables and the group's exposure to credit risk, exchange rate risk and interest rate risk can be found in Note 3 on Financial Risk Management.

(ii) Other financial assets at amortized cost

The group classifies its financial assets at amortized cost provided they meet the following two criteria:

- The asset is held within a business model that aims to receive contractual cash flows.
- The contractual terms give rise to cash flows that are solely receipts of principal and interest.

These amounts generally come from transactions outside the normal course of business for the group.

(iii) Trade and other payables

Trade and other payables are not guaranteed and are generally paid within 30 days of recognition, or up to 120 days in agreement with certain suppliers.

The book values of trade and other payables are treated as equal to their fair values, due to their short-term nature.

(iv) Loans

Secured liabilities and encumbered assets.

Bank loans are guaranteed using significant and representative Company assets, which are detailed in Note 31 (Guarantees and contingencies). The Company ensures that it complies with the financial ratios described in Note 17 (Other current and non-current financial liabilities).

The book values of financial and non-financial assets encumbered in order secure current and non-current loans are disclosed in Note 31 (Guarantees and contingencies).

NOTE 5 - SIGNIFICANT ACCOUNTING ESTIMATES AND JUDGMENTS

The estimates and judgments used are continually evaluated and are based on historical experience and other factors, including expectations of future events that are considered reasonable based on the circumstances.

The Company's main accounting estimates as follows.

a) Biomass of biological assets

The fish biomass estimate will always be based on assumptions, even though the Company has ample experience with these factors. The estimates take into account the following components: volume of fish biomass, average biomass weights, distribution of fish weights and market prices.

The volume of fish biomass estimate is based on the number of smolts in the sea, their estimated growth and their mortality during the period, etc. Uncertainty with respect to the volume of biomass is normally lower in the absence of mass mortality events or acute diseases during the cycle.

Fish grow at various rates and even though average weights can be accurately estimated, there is always a wide variation in the quality and size of the fish.

The value of fish biomass is based on a normal weight distribution.

b) Asset impairment

The recoverable amount of property, plant and equipment is revalued annually according to IAS 36, as the Company has intangible assets with indefinite lives. Factors that are considered an indication of impairment are declining market values, significant changes in the technological environment, obsolescence or physical deterioration, changes in the way the item is used or expected to be used, including ceasing to use it, etc. The Company evaluates whether there is evidence of impairment at each reporting date, which is whether the book value of an item of property, plant and equipment or an intangible asset is greater than its value in use.

It evaluates each Cash Generating Unit (CGU).

CGUs are identified for impairment testing. IAS 36 defines a CGU as "the smallest identifiable group of assets that generates receipts for the Company, which are largely independent of the receipts generated by other assets or groups of assets."

Therefore, given the Company as a whole, the characteristics of its assets and its productive and marketing processes, the Company's policy is that the CGU value to compare with future cash flows, is based on all the non-current assets as of the reporting date in the consolidated financial statements, less those assets that are not: Property plant and equipment and intangible assets other than goodwill.

The Company has used a cash flow forecasting model to calculate the value in use of its assets, based on the following assumptions.

1. Ten-year evaluation horizon. Investments within the industry are long-term, as are the cycles and risks that affect the biomass. Therefore, a horizon of less than 10 years does not reflect the Company's long-term situation.
2. Residual value. The residual value at the end of the horizon.

Forecast cash flows. Cash flows used in the methodology are based on budget data, best estimates and reasonable and substantiated assumptions that represent Management's best estimates, taking into account the prevailing economic conditions during the remaining useful life of the evaluated assets. The most important assumptions are:

2.1. Sales and production volumes.

2.2. Estimated annual inflation and its impact on prices, sales and administration costs, and other costs.

3. Cash flow forecasts are brought to present value using a discount rate that reflects the time value of money and the risks specific to the asset. The Weighted Average Cost of Capital (WACC) rate is used, calculated on the basis of the following variables: The Company or industry beta; the risk-free rate of return; the market rate of return; the cost of the Company's financial debt; and the long-term target debt / equity ratio.

This evaluation resulted in no indications of asset impairment.

Except for the estimated biomass of the biological assets, Management believes that these consolidated financial statements do not contain any assumptions about the future or other uncertain estimates that risk causing significant adjustments to this accounting period and the next.

NOTE 6 - CASH AND CASH EQUIVALENTS

Cash and cash equivalents are as follows.

	06/30/2023 ThUS\$	12/31/2022 ThUS\$
Cash balances	74	69
Bank balances	7,420	20,722
Total cash and cash equivalents	7,494	20,791

NOTE 7 - TRADE AND OTHER RECEIVABLES

Trade and other receivables are as follows.

	06/30/2023			12/31/2022		
	Trade receivables	Impaired receivables provision	Net trade receivables	Trade receivables	Impaired receivables provision	Net trade receivables
Customers	5,230	(203)	5,027	12,320	(261)	12,059
Insurance receivables	1,466	-	1,466	1,466	-	1,466
Miscellaneous receivables	7	-	7	1,159	-	1,159
Total current assets	6,703	(203)	6,500	14,945	(261)	14,684

Salmones Camanchaca S.A. does not have any receivables that are guaranteed or renegotiated or any payments that have been rejected and have entered judicial collection. It has not factored any of its receivables during 2023 and 2022.

The Company has no financial assets as of the reporting date that are in arrears and not impaired.

The insurance receivable is the disputed indemnity for the loss at the Islotes site in 2020, which is the subject of legal proceedings.

Classification of receivables by due date.

Overdue ranges	06/30/2023				12/31/2022			
	Number of customers non-renegotiated portfolio	Gross non-renegotiated portfolio ThUS\$	Impaired receivables provision ThUS\$	Net trade receivables ThUS\$	Number of customers non-renegotiated portfolio	Gross non-renegotiated portfolio ThUS\$	Impaired receivables provision ThUS\$	Net trade receivables ThUS\$

NOTE 8 - BALANCES AND TRANSACTIONS WITH RELATED PARTIES

Related parties include the following entities and individuals.

- a) Shareholders that can exercise control
- b) Subsidiaries and their members
- c) Parties with sufficient interest to give them significant influence
- d) Parties with joint control
- e) Associates
- f) Interests in joint ventures
- g) Senior management of the entity or of its parent company
- h) Close relatives of individuals described in the previous points
- i) An entity that controls, or jointly controls, and is significantly influenced by any of the individuals described in the two previous points.

Generally transactions with related companies are not subject to special conditions. These transactions are in accordance with Law 18,046 governing Corporations and with IAS 24.

Transactions with related companies are performed under conditions identical to other transactions regularly carried out by the Company.

Transferring current and non-current funds between related companies, which do not relate to the collection or payment of services, are structured using commercial current accounts.

a) Related party receivables are as follows:

- Current

	Chilean ID number	Country	Payment terms	Currency	06/30/2023 Current ThUS\$	12/31/2022 Current ThUS\$

d) Remuneration and benefits received by the Board and Senior Management.

The Company is managed by a Board of Directors, whose members received fees totaling ThUS\$ 225 during 2023 (ThUS\$ 195 in 2022).

The remuneration of Senior Management during 2023 amounted to ThUS\$ 1,963 (ThUS\$ 982 in 2022).

NOTE 9 – INVENTORIES

Inventories as of each reporting date are as follows.

	Unit of Measure	06/30/2023		12/31/2022	
		Quantity	ThUS\$	Quantity	ThUS\$
Finished products*	Kilo	2,813,207	30,864	4,371,827	41,918
Fair value of biological assets harvested but not sold*	N/A	-	190	-	3,149
Production supplies	N/A	-	13,101	-	13,334
Net realizable value provision*	N/A	-	(1,302)	-	(230)
Loss provisions	N/A	-	(107)	-	(186)
Total			42,746		57,985

* Total finished product inventory at net realizable value plus fair value.

Quantities are for finished products and differences in processes, qualities or value added are not distinguished.

Group inventories are valued at the lower of cost or net realizable value.

9.1 Information on finished products

The Company has not written off any finished products at the reporting dates.

The Company has not pledged inventories of finished products in guarantee as of June 30, 2023 and December 31, 2022.

The Company has insurance covering its inventories of finished products (Stock Throughput), which includes raw materials (at agreed value or cost), consumables (cost value) and work-in-process and finished products (agreed value).

9.2 Conciliation of finished products

Movements in finished products are as follows.

	06/30/2023 ThUS\$	12/31/2022 ThUS\$
Opening balance	44,837	30,042
Increases for transformation costs	25,761	69,638
Increases for harvested biological assets	96,085	214,475
Cost of sales	(132,899)	(273,698)
Fair value of harvested biological assets	15,293	53,856
Fair value of harvested and sold biological assets	(18,253)	(51,390)
Net realizable value provision	(1,072)	1,914
Closing balance	29,752	44,837

Cost of sales is composed as follows.

	For the six months ended June 30,		For the three months ended June 30,	
	2023 ThUS\$	2022 ThUS\$	2023 ThUS\$	2022 ThUS\$
Cost of products sold	133,971	136,258	51,626	67,500
Cost of services	2,025	2,008	623	662
Cost of other products	165	237	147	229
Cost of fallow periods	7,436	5,078	4,731	2,557
Mortality and mitigation costs	877	4,246	836	596
Sovereignty costs	757	713	498	300
Total	145,231	148,540	58,461	71,844

NOTE 10 - BIOLOGICAL ASSETS

Movements in biological assets are as follows.

	06/30/2023 ThUS\$	12/31/2022 ThUS\$
Opening balance as of January 1	136,071	115,561
Increases from farming and production	142,505	237,696
Decreases from harvests (measured at cost)	(96,085)	(214,475)
Smolt selling costs	(19)	(290)
Fair value adjustment for the period	12,076	57,130
Fair value of harvested biological assets, transferred to inventories	(15,293)	(53,856)
Mortality losses	(877)	(5,695)
Closing balance	178,378	136,071

Biological assets are as follows:

Biomass as of 06/30/2023	Thousand units	Final biomass Ton.	Production costs ThUS\$	Fair value adjustments ThUS\$	Total cost ThUS\$
Fish in sea water	13,184	30,271	159,728	4,776	164,504
Fish in fresh water	30,484	586	13,874	-	13,874
Total			173,602	4,776	178,378

Biomass as of 12/31/2022	Thousand units	Final biomass Ton.	Production costs ThUS\$	Fair value adjustments ThUS\$	Total cost ThUS\$
Fish in sea water	10,127	22,147	114,399	7,994	122,393
Fish in fresh water	20,969	626	13,678	-	13,678
Total			128,077	7,994	136,071

Movements in the fair value adjustments for biological assets are as follows.

	06/30/2023 ThUS\$	12/31/2022 ThUS\$
Opening balance fair value adjustments for biological assets	11,143	5,403
Increase due to biological adjustments for the period	12,076	57,130
Less: Fair value adjustment for sales of inventories	(18,253)	(51,390)
Closing balance fair value adjustments	4,966	11,143

The effect on the fair value adjustment is as follows.

Fair Value	For the six months ended June 30,		For the three months ended June 30,	
	2023 ThUS\$	2022 ThUS\$	2023 ThUS\$	2022 ThUS\$
Gain (loss) on fair value of biological assets harvested and sold	12,076	25,666	5,254	19,926
Less: fair value adjustments to biological assets	(18,253)	(17,538)	(3,975)	(14,557)
Closing balance of fair value of biological assets	(6,177)	8,128	1,279	5,369

Sensitivity analysis on the effect on fair value, due to an increase or decrease in price at the reporting date is as follows.

	Change in ThUS\$			
	Increase US\$0.1	Decrease US\$0.1	Increase US\$0.2	Decrease US\$0.2
Salmon	1,088	(1,054)	2,204	(2,070)

NOTE 11 - OTHER CURRENT AND NON-CURRENT NON-FINANCIAL ASSETS

Other current and non-current non-financial assets are as follows.

	06/30/2023		12/31/2022	
	Current ThUS\$	Non-current ThUS\$	Current ThUS\$	Non-current ThUS\$
Insurance policies	6,172	-	1,209	-
Recoverable taxes	7,965	-	6,192	-
Prepaid rent	-	-	3	-
Prepaid expenditure at sites	4,049	-	1,579	-
Other prepaid expenditure	793	112	257	112
Total	18,979	112	9,240	112

NOTE 12 - EQUITY METHOD INVESTMENTS

Investments in associates as of June 30, 2023 are as follows.

Chilean ID number	Name	Country	Investments in associates ThUS\$	Participation %
77,970,900-0	Surproceso S.A.	Chile	3,495	33.33
Total			3,495	

Investments in associates as of December 31, 2022 are as follows.

Chilean ID number	Name	Country	Investments in associates ThUS\$	Participation %
77,970,900-0	Surproceso S.A.	Chile	2,854	33.33
Total			2,854	

A summary of these associate's assets and liabilities is as follows.

	06/30/2023		12/31/2022	
	Assets ThUS\$	Liabilities and Equity ThUS\$	Assets ThUS\$	Liabilities and Equity ThUS\$
Current	7,600	3,992	6,603	4,611
Non-current	6,877	10,485	6,570	8,562
Total	14,477	14,477	13,173	13,173

Operating revenue and net income for the period for these associates are as follows.

	As of 06/30/2023 ThUS\$	As of 06/30/2022 ThUS\$
Operating revenue	9,274	6,346
Net income for period	1,345	1,128

NOTE 13 - Current and non-current tax assets

Current tax assets are as follows.

	06/30/2023 ThUS\$	12/31/2022 ThUS\$
Recoverable taxes	420	211
Provisional payment for absorbed profits	1,339	1,293
Training expenses, Sence	-	209
Other recoverable taxes	68	64
Total	1,827	1,777

Non-current tax assets are as follows.

	06/30/2023 ThUS\$	12/31/2022 ThUS\$
Investment tax incentive (1)	5,052	4,978

(1) The tax incentive is for investments in the Aysen Region, in accordance with Law 19,606 (Ley Austral). The deadline to recover this incentive is 2045, by discounting it from corporate income tax.

NOTE 14 - INTANGIBLE ASSETS OTHER THAN GOODWILL

Non-internally created intangible assets are as follows.

	Useful life	06/30/2023 ThUS\$	12/31/2022 ThUS\$
Aquaculture concessions and water rights	Indefinite	6,972	6,972
	Total	6,972	6,972

Movements of intangible assets as of June 30, 2023 and December 31, 2022, are as follows:

	06/30/2023 ThUS\$	12/31/2022 ThUS\$
Balance as of January 1	6,972	6,972
Closing balance	6,972	6,972

Closing balance as of December 31, 2022	6,270	28,394	85,902	30	209	787	121,592

* Contains Austral Law tax credits. No transactions have been incurred so far this year that would entitle the Company to this credit (ThUS\$ 2,486 in 2022).

Property, plant and equipment as of June 30, 2023 is as follows.

	Gross value ThUS\$	Accumulated depreciation ThUS\$	Net value ThUS\$
Land	6,270	-	6,270
Buildings	52,801	(25,020)	27,781
Plant and equipment	230,286	(143,370)	86,916
Vessels	2,742	(2,706)	36
Motor vehicles	2,037	(1,831)	206
Other property, plant and equipment	6,079	(5,481)	598
Right-of-use leased assets*	3,658	(3,082)	576
Total	303,873	(181,490)	122,383

* Right-of-use leased assets are mainly site equipment and transport vehicles for the business, according to IFRS 16. These leasing contracts are normally for a 3 year period.

Property, plant and equipment as of December 31, 2022 is as follows.

	Gross value ThUS\$	Accumulated depreciation ThUS\$	Net value ThUS\$
Land	6,270	-	6,270
Buildings	52,539	(24,145)	28,394
Plant and equipment	220,837	(135,613)	85,224
Vessels	2,730	(2,700)	30
Motor vehicles	2,040	(1,831)	209
Other property, plant and equipment	5,921	(5,134)	787
Right-of-use leased assets*	3,658	(2,980)	678
Total	293,995	(172,403)	121,592

* Right-of-use leased assets are mainly site equipment and transport vehicles for the business, according to IFRS 16. These leasing contracts are normally for a 3 year period.

a) Valuation

Management has chosen the cost model as its accounting policy, and has applied this policy to all items in property, plant and equipment.

b) Depreciation method

The depreciation method applied to all items of property, plant and equipment (excluding land) is the straight line method, which produces a constant expense over their useful life.

The depreciation expense was distributed as follows.

	Administrative expense ThUS\$	Distribution expense ThUS\$	Production expense ThUS\$	Total ThUS\$
June 30, 2023	22	21	9,044	9,087
December 31, 2022	54	77	17,631	17,762

c) Property, plant and equipment subject to guarantees or restrictions

The Company has mortgaged and pledged property, plant and equipment to guarantee the syndicated loan, and the details are disclosed in Note 31.

d) Insurance

The Company has insurance policies to cover the risks to items of property, plant and equipment, including in some cases loss of profit or loss due to strikes. The Company constantly analyzes its insurance cover to ensure that it is reasonable when compared to the risks inherent to its business.

e) The gross value of properties, plant and equipment items that are fully depreciated and still in use are as follows.

	06/30/2023 Gross value ThUS\$	12/31/2022 Gross value ThUS\$
Buildings	11,879	12,312
Plant and equipment	50,989	51,687
Motor vehicles	67	86
Total	62,935	64,085

f) There are no items of property, plant and equipment that are no longer actively used, but not classified as held for sale, in accordance with IFRS 5.

g) Management believes that all items of property, plant and equipment have fair values that are not significantly different from their book values.

NOTE 16 - INCOME AND DEFERRED TAXES

Deferred taxes are as follows.

	06/30/2023		12/31/2022	
	Deferred tax assets ThUS\$	Deferred tax liabilities ThUS\$	Deferred tax assets ThUS\$	Deferred tax liabilities ThUS\$

Total	(2,163)	(7,002)	693	(6,445)

Reconciliation of tax expense using statutory rate to tax expense using effective rate.

	For the six months ended June 30,		For the three months ended June 30,	
	2023 ThUS\$	2022 ThUS\$	2023 ThUS\$	2022 ThUS\$
Income tax expense using the statutory rate	(2,211)	(6,881)	702	(6,293)
Income tax on salaries and wages	(7)	(8)	11	(5)
Tax effect of non-taxable revenue	121	102	46	68
Tax effect of non-deductible expenses	(66)	(215)	(66)	(215)
Total	(2,163)	(7,002)	693	(6,445)
Effective rate	26.41%	27.48%	26.65%	27.65%

NOTE 17 - OTHER CURRENT AND NON-CURRENT FINANCIAL LIABILITIES

Other financial liabilities are as follows.

Current

	06/30/2023 ThUS\$	12/31/2022 ThUS\$
Interest-bearing loans	9,762	909
Total current	9,762	909

Non-current

	06/30/2023 ThUS\$	12/31/2022 ThUS\$
Interest-bearing loans	96,815	94,956
Total non-current	96,815	94,956

On November 27, 2017 Salmones Camanchaca S.A. and its parent company Camanchaca S.A. signed a debt rescheduling, financing commitment and joint and several guarantee contract with DNB Bank ASA, Cooperative Rabobank U.A. and Banco Santander Chile S.A., as legalized in a public deed. It rescheduled these company's liabilities totaling US\$ 165 million as of that date, where US\$ 100 million relates to Salmones Camanchaca (Tranche C).

On February 9, 2021, Salmones Camanchaca S.A. signed a 1.5-year committed financing tranche for US\$ 35 million with DNB and Santander banks. This loan is part of the debt rescheduling and financing commitment agreement and constitutes Tranche D.

On November 18, 2021, Salmones Camanchaca S.A. rescheduled all its long-term financing facilities (Tranches C and D) with DNB Bank, Rabobank and Santander that total US\$ 135 million, and 10% of the principal will be repaid on 11-18-2024, 10% on 11-18-2025 and the balance of 80% on 11-18-2026.

This financing meets the five characteristics to be recognized as a Sustainability Linked Loan by the Loan Market Association (LMA) and the Loan Syndications and Trading Association (LSTA), who require linking interest margins to progress with specific sustainability indicators negotiated with lenders: i) Decreasing greenhouse gas emissions to achieve Carbon Neutrality by 2025; ii) Increasing the recycled fraction of non-hazardous solid waste; iii) Progressing occupational safety issues; iv) Reducing the Fish in - Fish out ratio; v) Increasing the percentage of ASC certified farming sites. The applicable margin may increase or decrease by up to 5 basis points depending on the number of metrics met.

- Tranche C conditions
 - Debtor: Salmones Camanchaca S.A.
 - Quantity: US\$ 100 million
 - Maturity: November 2026.
 - Two principal repayments of 10% of the tranche on November 18, 2024 and 2025, plus a final installment for the remaining 80% on November 18, 2026.
 - Rate: Applicable Margin + Libor for the period

- Tranche D conditions
 - Debtor: Salmones Camanchaca S.A.
 - Quantity: US\$ 35 million
 - Maturity: November 2026.
 - Two principal repayments of 10% of the tranche on November 18, 2024 and 2025, plus a final installment for the remaining 80% on November 18, 2026.
 - Rate: Applicable Margin + Libor for the period

The costs of tranches C and D are represented by a margin over LIBOR, which depends on the extent of borrowing measured every six months as the ratio between the previous twelve months EBITDA and Net Borrowing, and this margin will fluctuate between 2.25% and 3.70%. Migration to SOFR rates has been agreed with the financial institutions and these will come into effect as of November 2023.

The Company's most representative and significant assets are pledged in guarantee.

The current loan has the following financial covenants:

- a) Debt ratio must not exceed 4 times, defined as the ratio of Net Financial Debt to EBITDA for the last 12 calendar months.
- b) Equity ratio must be at least 40%, defined as the ratio of Total Equity to Total Assets.

These are measured semi-annually, based on the financial statements as of June and December each year. The Company has complied with these financial covenants as of the reporting date.

Salmones Camanchaca S.A. has used US\$ 65 million of Tranche C and US\$ 35 million of Tranche D, leaving US\$ 35 million of Tranche C available. So far, it has used short-term credit lines from Banco Santander totaling US\$ 10 million.

Interest-bearing loans

* Legal proceedings are described under Note 31 c) on contingencies

Movements in provisions are as follows:

	Legal proceedings provisions		Site closure costs provisions	
	06/30/2023 ThUS\$	12/31/2022 ThUS\$	06/30/2023 ThUS\$	12/31/2022 ThUS\$
Opening balance	218	105	9,323	7,441
Increases	281	203	11,546	20,575
Decreases or payments	-	(90)	(9,236)	(18,693)
Closing balance	499	218	11,633	9,323

NOTE 21 - EMPLOYEE BENEFIT PROVISIONS

As of June 30, 2022 and December 31, 2022, these are detailed as follows.

	Current		Non-current	
	06/30/2023 ThUS\$	12/31/2022 ThUS\$	06/30/2023 ThUS\$	12/31/2022 ThUS\$
Staff vacation provisions	1,473	1,732	-	-
Employee severance indemnities	230	8	901	945
Total	1,703	1,740	901	945

The Company records a liability for severance indemnities for years of service, in accordance with collective and individual agreements with several groups of employees. The calculation of this obligation is described in Note 2.23.

NOTE 22 – EQUITY

a) Capital Management

Capital management aims to safeguard its ability to continue as a going concern, to generate returns for its shareholders, to generate benefits for other stakeholders, and to maintain an optimal structure that reduces its cost of capital.

It forms part of the Company's Investment and Financing Policy, which establishes that investments must have appropriate project-specific financing, to maintain its productive assets in optimal operating conditions as well as those that increase its productive capacity to comply with the Company's strategic development plan, and other matters. Therefore, financing should provide the funds required for its existing assets to operate well, and for new investments, in accordance with the investment policy. Financing includes using its own resources and external resources up to a limit that does not compromise the Company's equity position or limit its growth. The Company will maintain several financing options open, such as short and long-term bank loans, supplier credit and other sources.

Salmones Camanchaca S.A. reports compliance with its commitments to financial institutions every six months. There are covenants related to its capacity to generate profits and equity, which are presented in note 17. As of June 30, 2023 and December 31, 2022, the Company has complied with the financial indicators required by these commitments, and any non-compliance has been duly authorized by the respective financial institutions.

b) Share capital

The Company's share capital is as follows.

	06/30/2023 ThUS\$	12/31/2022 ThUS\$
Share capital		
Share capital	139,814	139,814
Total	139,814	139,814

Common Shares	Total number of shares	
Balance as of June 30, 2023 and 2022	74,195,160	74,195,160

c) Share premium

	06/30/2023 ThUS\$	12/31/2022 ThUS\$
Share premium	2,286	2,286
Total	2,286	2,286

The share premiums are the difference between the issued share capital value and the total shares subscribed and paid in the capital increase in 2021.

d) Dividend provision

As of December 31, 2022, the Company had a final dividend provision of ThUS\$ 12,155, equivalent to 30% of its net distributable income.

An Annual General Shareholders' Meeting was held on April 21, 2023, which agreed to declare a final dividend of ThUS\$ 24,310, equivalent to approximately 60% of net distributable income for the year ended December 31, 2022, and it was paid in May 2023.

The dividend provisions for 2022 were calculated as follows:

Description	Interim As of 12/31/2022 30% ThUS\$	Final As of 12/31/2022 60% ThUS\$
Net income for the year	44,704	44,704
Reductions from net distributable income		
Fair value adjustment for the year	5,740	5,740
Deferred taxes	(1,551)	(1,551)
Net fair value adjustment	4,189	4,189
Net distributable income	40,515	40,515
Dividends equivalent to 30%	12,155	24,310
DIVIDENDS	ThUS\$	ThUS\$
Controller Camanchaca	8,544	17,087
Non-controlling shareholders	3,611	7,223
Total Dividends	12,155	24,310

The company is not obliged to distribute dividends to shareholders in interim financial statements, so there is no dividend provision for the period.

e) Other reserves

Other reserves are as follows.

	06/30/2023 ThUS\$	12/31/2022 ThUS\$
Translation of other companies reserves	(1,262)	(1,455)
Corporate reorganization reserves*	23,515	23,515
Actuarial gains and losses on defined benefit plans reserves	23	3
Total	22,276	22,063

(*) These reserves include the difference between the book value and the proceeds assigned to the capital increase in 2017 of the shares in Fiordo Blanco S.A. and Surproceso S.A., as this transaction was carried out between companies under common control.

Movements in retained earnings are as follows.

	06/30/2023 ThUS\$	12/30/2022 ThUS\$
Opening balance	48,889	16,340
Legal minimum interim dividends	-	(12,155)
Final dividends that exceed the legal minimum	(12,155)	-
Net income (loss) for the year	6,027	44,704
Closing balance	42,761	48,889

NOTE 23 - EARNINGS PER SHARE

Earnings per share are as follows.

	For the six months ended June 30,		For the three months ended June 30,	
	2023 ThUS\$	2022 ThUS\$	2023 ThUS\$	2022 ThUS\$
Net income attributable to shareholders	6,027	18,482	(1,907)	16,861
Weighted average number of shares	74,195,160	74,195,160	74,195,160	74,195,160
Basic earnings (loss) per share (US\$/share)	0.0812	0.2491	(0.0257)	0.2273

Basic earnings per share takes the net income for the period and divides it by the number of single series shares.

The Company has not issued convertible debt or other equity securities. Consequently, there are no potentially diluting effects on earnings per share.

NOTE 24 - OPERATING REVENUE

Operating revenue is as follows.

	For the six months ended June 30,		For the three months ended June 30,	
	2023 ThUS\$	2022 ThUS\$	2023 ThUS\$	2022 ThUS\$
Fresh salmon sales	72,217	66,824	25,197	39,276
Frozen salmon sales	99,130	106,611	35,943	55,151
Services	2,463	1,921	891	956
Other products	3,404	3,036	1,389	2,063
Total	177,214	178,392	63,420	97,446

Operating revenue by destination market is as follows:

DESTINATION	06/30/2023 %	06/30/2022 %
Exports	91.78	87.19
Chile	8.22	12.81
Total	100.00	100.00

DESTINATION	06/30/2023 %	06/30/2022 %
USA	34.81	45.03

NOTE 29 - OTHER INCOME (LOSSES)

Other net income and losses for the period are as follows.

	For the six months ended June 30,		For the three months ended June 30,	
	2023 ThUS\$	2022 ThUS\$	2023 ThUS\$	2022 ThUS\$
Net gain (loss) on selling assets	3	(185)	-	(53)
Gain (loss) on insurance claims	12	50	12	-
Costs of disposing of property, plant and equipment	-	(506)	-	(352)
Earnings from the trout joint venture	(1,334)	85	(951)	(726)
Total	(1,319)	(556)	(939)	(1,131)

The joint venture that manages the trout business where Salmones Camanchaca has a one third participation is not a legal entity that is separate from the Manager, Caleta Bay. The Company does not exercise joint control nor significant influence over key business decisions, which are entirely the responsibility of the Manager throughout its value chain. It manages this business in its own name and risk and is responsible for it before the aquaculture, sanitary, environmental and other authorities. The only assets that the Company contributes to this trout joint venture are the concessions where the fish are farmed, and it receives variable compensation associated with this contribution. Therefore, it does not comply with the definition of a joint venture or joint business for accounting purposes, nor can it be measured at fair value as a financial asset under IFRS 9, since the Company's accounting policy is to value concessions at cost. As the concessions contributed by the Company to the trout joint venture have never been legally transferred to the Manager, these concessions cannot be valued at fair value, according to IAS 8.10. Therefore, the Company's accounting policy is to recognize one third of the trout joint venture earnings in Other income and losses within the consolidated statement of net income by function, which is recycled annually.

NOTE 30 - ASSETS AND LIABILITIES IN FOREIGN CURRENCIES

NOTE 31 - GUARANTEES AND CONTINGENCIES

a) Bank loans

Salmones Camanchaca S.A. provided collateral using its main assets on November 27, 2017, under the debt rescheduling, financing commitment and joint and several guarantee contract with DNB, Rabobank and Banco Santander and any successive rescheduling, as follows.

- i. Mortgage on six plots including everything built on them, four in Tome, one in Puerto Varas and one in Calbuco.
- ii. Four on naval vessels.
- iii. Pledge
 - a. Non-possessory pledge over salmon processing plants in Tome, Calbuco and the Hatchery in Petrohue.
 - b. All its aquaculture concessions dedicated to salmon and trout.

b) Direct guarantees

Debtor		Guarantee	Asset	Book value ThUS\$
Name	Relationship			
Salmones Camanchaca S.A.	Commercial	Concession mortgage	Concessions	6,972
Salmones Camanchaca S.A.	Commercial	Property mortgage	Tome real estate	7.056
Salmones Camanchaca S.A.	Commercial	Property mortgage	Puerto Varas real estate	2.215
Salmones Camanchaca S.A.	Commercial	Property mortgage	Calbuco real estate	214

Salmones Camanchaca S.A.	Commercial	Pledge	Machinery and equipment	18.844
Salmones Camanchaca S.A.	Commercial	Pledge	Buildings and construction	15.711

c) Contingencies

The Company regularly evaluates the likelihood of loss on its litigation and contingencies, in accordance with estimates provided by its legal advisers. Detailed information relating to these processes is available, provided it does not compromise the Company's interests. The Company has litigation or administrative proceedings before the Courts of Justice or administrative bodies as of the reporting date. Therefore, it had created the following provisions as of June 30, 2023 and December 31, 2022.

Proceedings	06/30/2023		12/31/2022	
	Number of cases	Accounting provision ThUS\$	Number of cases	Accounting provision ThUS\$
Civil	10	121	9	157

Total	32	499	23	218

NOTE 32 - SANCTIONS

The Company, its Directors and Managers have not been subject to sanctions of any kind by the Financial Market Commission or other administrative authorities as of the date these consolidated financial statements were issued.

NOTE 33 – THE ENVIRONMENT

Salmones Camanchaca S.A. continuously renews its commitment to the environment, by implementing new processes and technologies at its production plants. This has enabled it to achieve a sustainable business, and to further cultivate species in an efficient manner, while minimizing its impact on the environment.

The Company invested in the following environmental mitigation projects during the period January 1 to June 30, 2023.

Project	06/30/2023 Investment ThUS\$
Waste management	862
Environmental services	114
Total	976

The Company invested in the following projects during the period January 1 to June 30, 2022.

Project	06/30/2022 Investment ThUS\$
Waste management	537
Environmental services	368
Total	905

The Company is committed to complying with all environmental regulations. In particular it will continue to actively participate in discussions regarding projects that involve amendments and improvements to environmental and health regulations, to ensure that these can be implemented from a technical, financial, social and environmental perspective. It is dedicated to supporting the best proposal for the environment and developing the industry.

NOTE 34 - SUBSEQUENT EVENTS

Between the closing date and the date these interim consolidated financial statements were issued, we are not aware of any other subsequent events that could significantly impact their interpretation.
